## SPECIAL FEATURES

- ▲ Electrolux Control System dictates voltage into motor despite regional variations, this protects it more. Also has soft start device.
- ▲ D = Domel Motor  
AL = Ametek-Lamb Motor
- ▲ LCD display includes system performance, check bucket, call for service, total operating hours, time & temperature.
- ▲ Anti-Microbial transparent bucket is impregnated with Alphasan.
- ▲ All appliances have a self-cleaning filter, but those that have the GORE filter sift out particles down to 0.3 microns.
- ▲ Atlis dual intake system means the intake pipe can be on either side of the appliance.
- ▲ Motor filter stops carbon being exhausted through the vents.
- ▲ Anti-vibration mounting system ensures appliance fits snugly against the wall.

## WHAT SIZE APPLIANCE IS BEST FOR MY HOME?

A combination of the number of inlets you require (usually determined by the length of hose you choose) and how far away the furthest inlet will be from the appliance in duct route length. This is normally to an upstairs inlet if the appliance is downstairs, not 'as the crow flies'.

Also convenience is a consideration in the size of the dirt receptacle ie SC395 as opposed to SC385.
